### Report Overview:

A continuous filament winding machine (CFW Machine / CW Machine) is a machine for laying filament windings continuously over a cylindrical steel band. The steel band is carried on a forward moving mandrel which is able to collapse and return to the beginning of the travel. The steel band is released after the mandrel collapses and is continuously fed back to the start of the travel where it is again wound on to the mandrel. Continuous Filament Winding (CFW) Machine is designed & manufactured for GRP pipe production. Compared to Dis-continuous Filament Winding (DFW) Machine, it has characteristics of high production efficiency, low cost, labor saving and environmentally friendly.
