A charging port flap refers to a protective cover or door that conceals the charging port of an electric vehicle (EV) or plug-in hybrid vehicle (PHEV). This flap serves multiple purposes: it helps to keep the charging port clean and free from debris, protects it from environmental elements such as rain, snow, and dirt, and provides a streamlined aesthetic to the vehicle's design. Typically made from durable materials, the flap is designed to open easily when the vehicle is being charged and securely close when not in use. Some modern vehicles may even feature automated flaps that open and close with the push of a button, enhancing convenience for the user.
