Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Chlorine Free Paper competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Chlorine-free paper refers to paper products that do not use elemental chlorine or are produced using a chlorine-free bleaching process during the papermaking process. This type of paper uses alternative bleaching agents such as chlorine dioxide, hydrogen peroxide or ozone to remove lignin and improve whiteness, thereby reducing the emission of organic chlorides that are harmful to the environment. Chlorine-free paper is widely used in environmentally friendly office paper, household paper, packaging paper and cultural paper. It has a lower risk of environmental pollution and meets the requirements of green and sustainable development. With the increase of global environmental awareness and the rise of green consumption trends, chlorine-free paper is gradually replacing traditional chlorine-bleached paper products and becoming an important development direction for the papermaking industry. In the future, chlorine-free paper will develop in a more efficient, low-carbon and renewable direction, further optimize the bleaching process to reduce energy consumption and chemical residues, and promote the application of total chlorine-free bleaching (TCF) technology. In addition, the use of biomass raw materials, recycled fibers and intelligent production methods to improve resource utilization will also be a key path for the continuous upgrading of the chlorine-free paper industry. The dual drive of policy guidance and consumer preference will prompt more papermaking companies to transform to green and clean production, and expand the application share of chlorine-free paper in high-end household paper, food packaging, publishing and printing and other fields.

The global Chlorine Free Paper market size was estimated at USD 824.0 million in 2025
