Circuit protection products refer to components or devices designed to protect electronic equipment, circuits, and systems from faults and damage caused by overcurrent, overvoltage, short circuits, electrostatic discharge (ESD), surges, and overheating. The primary function of these products is to enhance the reliability of devices, extend their service life, reduce the likelihood of failure, and prevent damage to circuits due to power surges, faults, or improper operation. Common types of circuit protection products include fuses, overvoltage protectors, overcurrent protectors, transient voltage suppressors (TVS), thermistors, thermal protectors, and lightning arresters. The scope of application for circuit protection products is vast, spanning multiple industries such as household appliances, industrial equipment, automobiles, communication devices, computers, and consumer electronics. With the continuous advancement of modern technology, the demand for efficient, precise, and reliable circuit protection products is on the rise. For instance, in the automotive industry, circuit protection products are used for battery management systems, in-vehicle electronics, and charging facilities; in the consumer electronics sector, smartphones, laptops, televisions, and other devices require effective circuit protection to handle current fluctuations and voltage spikes. Circuit protection products also include a variety of auxiliary components related to electrical protection, such as overcurrent protectors, overvoltage protectors, and leakage protectors. These products are designed with the operational characteristics of different types of circuits and environmental factors in mind, ensuring their effectiveness in various usage conditions. Therefore, circuit protection products are not just simple protective devices, but essential components of a comprehensive safety system for electronic equipment.

The global Circuit Protection Products market size was estimated at USD 6800.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.80%
