Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Closed Cell Rigid PVC Foam competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global production of Closed Cell Rigid PVC Foam reached 1.8742 million cubic meters, with an average selling price of \$351.94 per cubic meter and a cost of approximately \$309.38 per cubic meter. Gross profit margins range from 13.97% to 38.00%, depending on the company. Single-line production capacity is 20,000 cubic meters. The upstream industry includes BASF, and downstream customers include Sinoma Blade, Sany Zhangjiakou Wind Power Technology Co., Ltd., Zhuzhou Times New Material Technology Co., Ltd., China National Building Material Group, Sany Renewable Energy Co., Ltd., Ming Yang Smart Energy, Titan Wind Energy, Sino-Wind Energy Co., Ltd., Zhongfu Lianzhong Windpower Science and Technology Co., Ltd., Envision Energy, etc. Rigid foam is the core material in sandwich composite materials. Sandwich structures are a special form of laminated composite material, generally consisting of facesheets, a bonding layer between the facesheets and the core, and the core. Rigid foam's core performance is low density and high strength. This core characteristic allows rigid foam to be used in sandwich structures to significantly enhance mechanical properties with virtually no weight increase. Mechanical properties can be increased by 3-4 times, or even 9-10 times, meeting the low-density, high-strength requirements of applications such as wind turbine blades, rail vehicles, ships, and aircraft. Major rigid foam materials on the market include PVC foam, PET foam, and PMI foam. Closed Cell Rigid PVC Foam has a closed-cell structure, excellent dynamic and static mechanical properties, and is resistant to water and various chemicals. Due to its superior performance and affordable price, it is currently the most widely used.

The global Closed Cell Rigid PVC Foam market size was estimated at USD 660.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 10.80% during the forecast period.
