## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Closed-cell Silicone Sponge Sheet competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. A flame-resistant silicone sponge sheet is a closed-cell silicone material that is flexible, compressible, and designed to self-extinguish after being exposed to a flame. It is used for gasketing, sealing, and insulation in applications requiring high-temperature resistance, vibration dampening, and critical fire safety, such as in electronics, automotive, and industrial equipment. Key properties include a wide operating temperature range, excellent compression set resistance, and resistance to UV and ozone. In 2024, global production of closed-cell silicone sponge sheets reached 2.05 million square meters, with an average selling price of US\$282 per square meter. This product typically has a single-line production capacity of approximately 300-500 square meters, with an industry gross profit margin of approximately 15%-25%. Raw materials account for the largest portion of the cost structure (approximately 50%-60%), primarily silicone rubber, followed by manufacturing overhead and labor, including equipment depreciation, utilities, and direct labor costs. The upstream component of this product is basic chemical raw materials, primarily including 107 silicone rubber, vinyl silicone fluid, hydrogenated silicone fluid, and other adhesives, as well as flame retardants (such as melamine phosphate, antimony trioxide, and aluminum hydroxide). The downstream market is for automotive, electronics and home appliance, energy/batteries, medical devices, and aerospace.

The global Closed-cell Silicone Sponge Sheet market size was estimated at USD 578.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.20% during the forecast period.
