Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Closed End Blind Rivets competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Closed End Blind Rivets are blind riveting fasteners, consisting of a rivet body (tubular structure) and a nail core. The nail core is pulled by a single-sided rivet gun to expand and deform the rivet body and seal the connection hole, achieving leak-proof (waterproof/dustproof), vibration-resistant and high-strength connection. Its core features include no exposure of the nail core after riveting, and corrosion-resistant sealing of the cavity, making it suitable for riveting heterogeneous workpieces such as metals, plastics, and composite materials.

The global Closed End Blind Rivets market size was estimated at USD 328.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.90% during the forecast period.
