Report Overview

The primary difference between customer relationship management software, sometimes called contact management software, that is Web-based and other forms is the deployment model. With traditional offerings, companies had to purchase and host the server on premise. They required an IT team to manage, update and maintain the server. Web-based deployment removes this burden by having the server hosted remotely by the vendor. It also reduces upfront investment, with vendors offering a pay-as-you-go plan instead.
