### Report Overview:

Cloud Fax Services is a simple, cost-effective cloud-based alternative to traditional fax machines and servers. Suitable for organizations of all sizes, it provides a streamlined faxing process, while substantially lowering your overall faxing costs. Cloud fax services are services that use the internet to send and receive faxes. Cloud fax services transmit email messages with attachments as faxes to actual fax machines or other digital fax services. The services can be hosted onsite as a private cloud solution or can be fully hosted offsite, or an organization can deploy a hybrid model. Messages are encrypted before they are sent, during processing, and during transfer, making this option as secure as a standalone fax machine.
