Abstracts

Cloud spending by small and medium-sized businesses (SMBs) refers to the financial investment these organizations allocate toward cloud-based services and infrastructure, encompassing a wide range of solutions such as Infrastructure-as-a-Service (IaaS), Platform-as-a-Service (PaaS), and Software-as-a-Service (SaaS). This expenditure includes costs related to data storage, computing power, application hosting, cybersecurity measures, and collaboration tools delivered via remote servers managed by third-party providers. For SMBs, cloud spending represents a shift from traditional on-premises IT investments to scalable, subscription-based models that offer flexibility, reduced upfront capital expenditure, and access to enterprise-grade technology without the need for extensive in-house expertise. The allocation is often driven by operational needs, digital transformation goals, and the pursuit of competitive agility, with spending patterns reflecting adoption rates across various cloud service models and deployment types (public, private, or hybrid).

The global Cloud Spending By Smbs market size was estimated at USD 332.5 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 15.20% during the forecast period.
