The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on CMS Electronic Rearview Mirror competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. CMS Electronic Rearview Mirrors are systems that replace traditional rearview mirrors with cameras and displays. They capture images of the rear and sides using cameras mounted on the exterior of the vehicle and then transmit these images in real time to a display inside the vehicle. In 2024, global production of CMS electronic rearview mirrors reached 4424.22 k units, with an average selling price of US\$254.4 per unit. Global production capacity in 2024 was approximately 5540 k units. The upstream of CMS electronic rearview mirrors mainly includes high-quality camera modules, image processing chips, display modules, electronic control units, and sensor and algorithm support. Suppliers include Sony, Texas Instruments, and BOE. Downstream customers mainly include automakers, parts suppliers, aftermarket suppliers, and end consumers. As an important component of smart cars, CMS electronic rearview mirrors have experienced rapid development in recent years. Especially with the dual support of policy promotion and technological advancements, CMS electronic rearview mirrors are gradually replacing traditional optical rearview mirrors, becoming an important choice for vehicle visibility systems. According to the GB 15084-2022 standard released in 2023, CMS (Computer-Assisted Rearview Mirror) is permitted to replace traditional rearview mirrors, providing policy support for the rapid development of the domestic market. Globally, although the market penetration rate of CMS electronic rearview mirrors is still relatively low, the market potential of CMS systems is enormous as the technology matures, costs continue to decrease, and consumer demand for intelligent driving increases.
