Report Overview

Carbon dioxide (CO₂) fire extinguishers are devices designed to extinguish fires by displacing oxygen, thus suffocating the fire. They are commonly used in areas where water or foam extinguishers may cause damage, such as in server rooms, laboratories, and electrical equipment areas. CO₂ fire extinguishers are known for their effectiveness in extinguishing Class B (flammable liquids) and Class C (electrical) fires. These extinguishers work by releasing pressurized carbon dioxide gas, which cools the fire and removes oxygen, thereby suppressing the combustion process.

The market for CO₂ fire extinguishers is experiencing steady growth due to several market trends and drivers. One of the key trends driving market growth is the increasing emphasis on fire safety regulations and standards across industries and residential spaces.
