Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Coasters and Placemats competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Coasters and Placemats production reached approximately 16.2 million units, with an average global market price of around US \$35 per unit. Coasters and placemats are protective and decorative table accessories designed to enhance dining experiences while safeguarding surfaces. Coasters are small, flat items placed under glasses, cups, or mugs to prevent heat marks, water rings, and scratches, while placemats are larger mats positioned beneath a full place setting to shield tables from spills, stains, and heat. Traditionally crafted from materials such as wood, bamboo, cork, fabric, leather, or synthetic composites, they serve both functional and aesthetic purposes, often complementing interior décor. Increasingly popular in households, restaurants, and hospitality settings, coasters and placemats are also widely used for branding and promotional purposes, with sustainable and customizable designs driving modern consumer demand.
