Abstracts

Coated rubber stopper refer to rubber stopper products that are partially covered with a firm layer on the contact surface between the rubber stopper and the drug, such as fluorine-coated film rubber stoppers. The film-coated rubber stopper adds a barrier plastic film on the surface of the rubber stopper to shield the contact between the rubber stopper and the drug, which can effectively reduce the absorption, leaching, and penetration between the rubber stopper and the drug, thereby effectively reducing or delaying the contact between the rubber stopper and the drug. The occurrence and development of capacitive problems can improve the long-term stability of drugs. After calculation, coated butyl rubber stopper market size is approximately 1157 million US dollars, with an compound annual growth rate of approximately 4.8%. China is the largest market among them.

The global Coated Butyl Rubber Stopper market size was estimated at USD 1265.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.80% during the forecast period.
