Abstracts

Coin-op stack dryers are commercial dryers that are designed to be stacked on top of each other, typically in laundromats or shared laundry spaces. The "coin-op" part refers to the fact that these machines are operated by inserting coins or tokens to start a drying cycle. The stack design saves space while allowing multiple dryers to be used in the same area. This setup is especially useful in places with limited room, as it allows for a higher number of units without taking up more floor space.

The global Coin-Op Stack Dryers market size was estimated at USD 471.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.20% during the forecast period.
