Cold chain foam packaging solutions are specially designed packaging materials that help maintain the desired temperature of temperature-sensitive products during transportation and storage. These packaging solutions are commonly used in the pharmaceutical, food and beverage, and healthcare industries to ensure that products remain safe and effective throughout the supply chain. Cold chain foam packaging solutions typically consist of thermal insulation material, such as expanded polystyrene (EPS) or polyurethane foam, that help maintain the temperature of the packaged products by reducing heat transfer. These materials provide excellent thermal insulation properties, offering protection against extreme temperatures and temperature fluctuations. Cold chain foam packaging solutions come in various forms, including thermal shipping containers, insulated shipping boxes, refrigerant gel packs, and insulated liners. These packaging solutions are designed to meet the specific temperature requirements of different products, ranging from frozen food items to temperature-sensitive medications.
