Report Overview

Cold-chain products are defined as any temperature-sensitive products, such as frozen foods, research samples or pharmaceuticals. Cold-chain packaging is critical to maintaining the thermal integrity of temperature-sensitive products during transportation. Cold-chain packaging can be active or passive packaging methods. An active packaging configuration is usually a rented container that uses a power supply, battery or power, and a Thermostat to control heating or cooling within the shipping container. Passive packaging configurations are containers made from insulated packaging (E. G.
