Abstracts

Cold-mount fluorine release film is a fluorine release film that is laminated at room temperature. It is a film material made of polyester film (PET) as the base material, coated with fluoroplastic release agent, and then bonded with silicone pressure-sensitive adhesive. During the laminating process, the fluorine release film does not need to be heated, but the residual heat of the silicone tape is used to closely fit the fluorine release film. Cold-mount fluorine release film is suitable for composite die-cutting and stamping of high-temperature silicone rubber pressure-sensitive tape, as well as laminating processing of various silicone products, such as 3M silicone double-sided tape 9731, 3M9119, 3M4377, etc.

The global Cold-coated Fluorine Release Film market size was estimated at USD 192.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.20% during the forecast period.
