## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Cold Cups and Lids competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Cold cups and lids are essential components used for serving cold beverages. Cold cups are specifically designed to hold chilled drinks such as iced coffee, cold tea, smoothies, and soft drinks. They are typically made from materials like plastic, paperboard with a plastic lining, or PET (polyethylene terephthalate) to ensure durability and prevent leakage while maintaining the cold temperature of the liquid. These cups come in various sizes, shapes, and capacities to meet different consumer needs. Cold cup lids, on the other hand, are used to cover the cups, providing a secure seal that helps prevent spills and splashes, and often feature a sip - hole or a straw - slot for convenient drinking. Lids can be made from similar materials as the cups and are designed to fit snugly on the cup rims. Together, cold cups and lids play a crucial role in the food and beverage service industry, offering a practical and hygienic solution for consumers to enjoy their cold drinks both on - the - go and at home.
