Abstracts

Cold pressed citrus oil is an essential oil extracted through mechanical pressing of the rinds of citrus fruits such as oranges, lemons, limes, and grapefruits, without the use of heat or chemical solvents, preserving the natural aromatic compounds, terpenes, and volatile constituents that define its fragrance, flavor, and functional properties. This method yields a product valued for its purity, intensity, and versatility across numerous industries, including food and beverage as a natural flavoring agent, aromatherapy and perfumery for its refreshing scent, cosmetics and personal care for its skin-beneficial qualities, and household cleaning products for its degreasing and antibacterial characteristics, distinguishing it from steam-distilled or solvent-extracted citrus oils which may alter or reduce certain bioactive components.
