Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Cold Rolled Titanium Strip Coil competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Cold Rolled Titanium Strip Coil production reached approximately 28.3 k tons, with an average global market price of around US\$15.25 per kilogram. Cold rolled titanium strip coil is produced by rolling titanium or titanium alloys at room temperature into strip form and winding into coils. It offers precise thickness, superior surface quality, balanced strength and ductility, making it suitable for aerospace, electronics, medical, and precision industrial applications. The upstream of Cold Rolled Titanium Strip Coil includes sponge titanium, ingots, and hot rolled titanium. Downstream applications cover aerospace, medical devices, electronic components, and precision manufacturing. The market for cold-rolled titanium strip coils is promising, driven by their exceptional light weight, high strength, corrosion resistance, and biocompatibility. These properties fuel demand across aerospace (e.g., aircraft components), marine engineering (e.g., ships and deep-sea equipment), medical implants, and electronics. Globally, the industry is advancing through technological innovations such as ultra-thin precision rolling and smart manufacturing, enhancing product quality and expanding applications. Chinese manufacturers are strengthening their global competitiveness by achieving breakthroughs in production technology (e.g., successfully rolling ultra-wide titanium coils) and expanding capacity, gradually reducing reliance on imports and breaking foreign monopolies. The future outlook remains robust, supported by trends towards green manufacturing and emerging applications in fields like flexible electronics and wearable devices.

The global Cold Rolled Titanium Strip Coil market size was estimated at USD 432.0

million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.00% during the forecast period.
