Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Collagen competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Collagen is a structural protein composed of amino acids that plays a crucial role in maintaining the strength and elasticity of connective tissues in the human body. It is essential for the health of skin, hair, nails, and joints, contributing to overall physical resilience. Collagen is primarily extracted from the tissues of livestock and poultry, including bones, skin, and cartilage. Its applications span multiple industries, such as food, cosmetics, nutraceuticals, and pharmaceuticals, due to its bioactive properties and benefits for skin rejuvenation, joint repair, and wound healing. Collagen's diverse functionality has enabled it to become a critical ingredient in multiple downstream industries. Among these, food applications including dietary supplements and functional food represent the largest consumption segment, accounting for 45.32% of total demand in 2024. The growing interest in preventive healthcare, clean-label nutrition, and beauty-from-within concepts is driving consumer preference for collagen-enriched products. In addition, the increasing use of collagen in cosmetic and pharmaceutical applications, such as anti-aging skin care and joint support treatments, has further expanded its market base. Technologically, collagen production remains a relatively high-barrier industry, requiring advanced expertise in enzymatic hydrolysis, purification, and molecular characterization. As a result, the market is concentrated among a few key global players that possess the technical know-how and production capacity to meet stringent quality and regulatory standards. These leading manufacturers include Rousselot, Gelita, PB Leiner, Weishardt International, Nitta Gelatin, Gelnex, Hubei Ruibang Biotechnology, Hengxin Biotech, and Taiaitai. Their ability to scale production while maintaining safety and bioactivity ensures their dominance in both developed and emerging markets.

The global Collagen market size was estimated at USD 1266.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.20% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Collagen market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
