Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Cologne For Men competitive dynamics, regional economic interdependencies, and supply chain reconfigurations.In 2024, global Eau de Cologne production reached approximately 275 M Units, with an average global market price of around 35.77 USD per Unit. Eau de Cologne (EDC) is a specific class of fragrance defined by its low concentration of aromatic oils, its traditional scent profile, and its historical use as a refreshing body tonic. Eau de Cologne contains the lowest concentration of aromatic compounds (essential oils and fragrance extracts) among the main fragrance categories. The oil content typically ranges from 2% to 5% diluted in a high-alcohol base (often around 70-90% alcohol).Today, consumers are no longer satisfied with just a simple fragrance function; natural and organic ingredients have become core demands. Eau de Cologne, with its added plant essential oils and absence of synthetic preservatives, is highly favored, and the market share of this high-end product line is steadily increasing. At the same time, Eau de Cologne has broken the traditional perception of ""men's fragrance,"" becoming a light fragrance choice suitable for all genders and ages. Young people see it as an important way to express their personal style, while health-conscious consumers value its gentle and refreshing user experience. The demand base continues to expand, and the market potential continues to be released.Eau de Cologne's upstream raw materials mainly include citrus oils, flavorings, and alcohol. Typical suppliers include Givaudan, Firmenich, Symrise, and Mane. Eau de Cologne's sales channels are primarily online and offline, with typical online platforms including Amazon, Walmart, Alibaba, and eBay.The production capacity of a single Eau de Cologne production line varies significantly depending on the size of the manufacturing company and the level of automation. Annual single-line capacity typically ranges from 1 million to 5 million bottles. Eau de
