## Abstracts

A color E-Ink tablet is a device that uses color electronic ink (E-Ink) technology, offering low power consumption, high contrast, and a paper-like display experience. Unlike traditional LCD or OLED screens, color E-Ink screens do not require backlighting, significantly reducing battery usage, making them ideal for extended reading and document viewing. The display utilizes microcapsule technology to render vibrant colors and clear images, commonly found in e-readers, digital magazines, notebooks, and note-taking devices. Due to its strong light resistance, it maintains excellent readability even under direct sunlight, making it an ideal choice for electronic reading and office use.

The global Color E-Ink Tablet market size was estimated at USD 451.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.10% during the forecast period.
