Abstracts

Commercial seeds are the seeds sown for production of an intended crop or used as animal feed or industrial raw material. The increasing global population is escalating the demand for commercial seeds. As commercial seeds yield higher output, the declining global arable land due to rapid urbanization acts as a driver for the demand of commercial seeds. However, factors restraining the global commercial seeds market include hue and cry amongst the common masses in the developed countries against the production of genetically modified crops as they believe it affects the human health due to their altered genes. Monsanto is the market leader in the global commercial seeds market with over 25% share. The other key market players include DuPont Pioneer, Syngenta International, Vilmorin & Cie SA, KWA SAAT AG and Bayer CropScience.

The global Commercial Seeds market size was estimated at USD 56.8 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.60% during the forecast period.
