### Report Overview:

A Commercial Soft Ice Cream Maker is a machine used to make quantities of ice cream for consumption. Soft Ice Cream Machine may prepare the mixture by employing the hand-cranking method or by employing an electric motor. The resulting preparation is often chilled through either pre-cooling the machine or by employing a machine that freezes the mixture.

A Commercial Soft Ice Cream Maker has to simultaneously freeze the mixture while churning it so as to aerate the mixture and avoid ice crystals. As a result, most ice creams are ready to consume immediately. However, those containing alcohol must often be chilled further to attain a firm consistency.
