Report Overview

The main function of a commercial vehicle cooling fan is to help regulate the temperature of the engine and ensure that it remains within a suitable operating range. When a commercial vehicle engine is running, it generates a large amount of heat, which if not properly cooled can cause overheating, affect engine performance and even cause damage. The cooling fan helps the radiator dissipate heat by sucking ambient air and delivering it to the radiator, thereby maintaining the normal temperature of the engine.

The global Commercial Vehicle Cooling Fan market size was estimated at USD 3850.42 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 6.80% during the forecast period.
