Abstracts

The commonly used magnetic cores for common mode inductors are U-shaped, E-shaped, and ring-shaped. In comparison, ring-shaped magnetic cores are relatively cheaper because they are very easy to manufacture and do not require consideration of the direction of winding. Other shapes of magnetic cores are composed of double sets of magnetic cores, and the pairing of the magnetic cores needs to be considered during molding. Fine polishing is also required in the later stage, but the magnetic permeability is much lower compared to closed magnetic cores.

The global Common Mode Inductor Core market size was estimated at USD 238.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 10.20% during the forecast period.
