Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Compact Dual-Band Blade Antenna competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global annual sales of compact dual-band blade antennas will reach approximately 378,000 units, with an average price of approximately US\$1,250 per unit and an industry average gross profit margin of approximately 32%. These high-performance airborne and ground-based communication antennas support dual-band signal transmission (typically VHF/UHF or L/S bands). They utilize low impedance matching, a broadband radiator design, and a composite housing to maintain signal stability in high-velocity airflow environments. Their core structure includes a conductive radiator, dielectric layer, shielding layer, and connector assembly. Metal conductors (aluminum alloy or copper) account for approximately 28% of the cost, composite dielectric materials for 22%, and RF connectors and housing components for approximately 18%. Dual-band blade antennas are widely used in military and civilian aircraft, drone communications, maritime and emergency vehicle platforms, and other applications. With increasing demand for multi-band converged communications and aviation data links, the market is expected to maintain steady growth. Upstream suppliers primarily include suppliers of RF coaxial cables, composite insulation materials, and precision CNC milled parts. Downstream customers include complete system manufacturers and communications integrators such as Boeing, Airbus, Safran, and Honeywell. British manufacturer HR Smith is a key supplier in this field, with an annual production capacity of approximately 98,000 units. Its products primarily focus on high-reliability military-standard components, which are widely used in European and North American aviation systems.

The global Compact Dual-Band Blade Antenna market size was estimated at USD 472.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.70% during the forecast period.
