## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Composite Cast Steel Rolls competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Composite Cast Steel Rolls are high-performance rolls manufactured using composite casting technology, typically featuring a high-alloy wear-resistant working layer bonded metallurgically to a tough steel core. This dual-layer structure combines superior surface hardness and wear resistance with excellent impact strength and thermal fatigue resistance. The rolls are widely applied in hot and cold rolling mills, especially in roughing stands, finishing mills, and backup roll positions for strip, bar, and plate production. Manufacturing involves centrifugal composite casting, static composite pouring, or electroslag remelting, ensuring a strong metallurgical bond and uniform microstructure. Upstream raw materials include high-carbon steel, high-chromium iron, nickel, molybdenum, vanadium, tungsten, alloy scrap steel, and premium casting additives, with strict control over melting purity and casting temperature. Downstream customers are mainly integrated steel producers and rolling mills, such as hot strip mills, wire rod mills, and seamless tube manufacturers. In 2024, the global production capacity of composite cast steel rolls is estimated at about 75,000 tons, with sales of roughly 62,000 tons, an average price of USD 2,350 per ton, and a gross margin of 18%–28%. As the steel industry continues to pursue higher efficiency, longer roll life, and lower operational costs, the demand for composite cast steel rolls is expected to grow steadily, led by strong adoption in the Asia-Pacific region.

The global Composite Cast Steel Rolls market size was estimated at USD 146.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.40% during the forecast period.
