## Abstracts

Compostable Paper Bowl is an environmentally friendly disposable tableware designed to biodegrade under composting conditions and convert into organic matter in the soil. The bowl is usually made from renewable resources such as recycled paper pulp, bamboo pulp or other natural plant materials, and may be coated with polylactic acid (PLA) or other compostable bioplastics to provide waterproof and grease barrier functions. Unlike traditional paper bowls, compostable paper bowls contain no plastic or other difficult-to-decompose chemicals, allowing them to completely decompose within a few weeks in professional industrial composting facilities.
