## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Computer Wireless Network Interface Controller competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Computer Wireless Network Interface Controller production reached approximately 12.13 million units, with an average global market price of around US\$ 30 per unit. A Computer Wireless Network Interface Controller (Wireless NIC) is a hardware component that allows a computer or other device to connect to a wireless network, enabling internet and local network access without the need for physical cables. It works by transmitting and receiving data over radio frequencies using Wi-Fi standards like IEEE 802.11. Wireless NICs are commonly integrated into modern laptops, desktops, smartphones, and tablets but can also be added as external devices, such as USB adapters or PCI cards. The overall computer wireless NIC market maintained steady growth, primarily driven by laptop and desktop upgrades and the increasing popularity of smart homes, remote work, and online entertainment. With the introduction of Wi-Fi 6 and the soon-to-be-adopted Wi-Fi 7 standards, wireless network cards have significantly improved their transmission speeds, low latency, and multi-device connectivity, driving growing demand for high-performance network cards. In the consumer market, USB external network cards, due to their portability and plug-and-play functionality, have captured a significant share among individual users, while internal PCIe wireless network cards are more popular in high-performance applications such as esports and graphics workstations. Demand for stable and high-speed wireless connectivity is also increasing in the enterprise and education markets, driving demand for high-end network cards. In terms of price, standard wireless network cards range from \$15 to \$30, with mid-range and high-end

products costing approximately \$50 to \$100. High-end Wi-Fi 6/6E/7 cards can cost over \$150. In terms of industry competition, manufacturers like Intel, Broadcom, Qualcomm, and Realtek hold advantages in core chips and standard setting, while brands like ASUS, TP-Link, and D-Link continue to innovate in terminal products. Overall, the computer wireless NIC market is evolving from low-cost, affordable products to high-performance, low-latency, and multi-functional products, and is expected to further integrate with 5G, Wi-Fi 7, and IoT applications in the future.

The global Computer Wireless Network Interface Controller market size was estimated at USD 364.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.30% during the forecast period.
