Abstracts

Concentrated glass cleaner is a specialized cleaning solution designed for professional and residential use, characterized by its high dilution ratio, which allows it to be mixed with water to produce a ready-to-use spray for streak-free cleaning of glass, mirrors, and other non-porous surfaces. These formulations typically include surfactants to break down dirt and grease, solvents like isopropyl alcohol for quick evaporation, and ammonia or vinegar alternatives to enhance shine while minimizing residue. The concentration enables cost efficiency, reduced packaging waste, and customizable dilution for varying cleaning intensities, making it a staple in janitorial services, automotive care, hospitality, and household maintenance.
