Abstracts

Concrete floor saw blades are specialized cutting tools designed for use in construction and renovation projects, featuring a circular steel core embedded with industrial-grade diamond segments along the outer edge to efficiently slice through concrete, asphalt, brick, and other hard, abrasive materials with precision and minimal dust generation. These blades are engineered for use with walk-behind or handheld saws and are categorized based on factors such as diameter, bond hardness, segment design, and intended application?including wet cutting (which uses water for cooling and dust suppression) or dry cutting (which employs airflow and heat-resistant bonds)?to optimize performance, blade longevity, and cut quality under varying job site conditions.
