Abstracts

Primer is a type of coating that is applied to a surface before painting or other finishing processes. It helps to improve the adhesion, durability, and appearance of the final product. Primer can be made of different ingredients, such as resin, additives, and pigments, depending on the application and the substrate. Primer can be used on metal, plastic, wood, concrete, and other materials. Some common types of primer are epoxy, polyurethane, acrylic, and latex. The future market trends of primer are expected to be driven by the increasing demand for paints and coatings in various end-use industries, such as building and construction, automotive, furniture, industrial, and packaging.
