Abstracts

The core purpose of the coating process is to apply a thin film to the surface of electronic equipment. This film acts as a shield to effectively isolate the potential corrosion of electronic components from the external environment. The AOI system after coating plays the role of quality guardian. It intervenes immediately after the coating process and uses cutting-edge high-precision optical technology to meticulously check the integrity of the coating layer. The system can accurately identify subtle defects such as bubbles, cracks, and uneven coating to ensure that the coating quality meets high standards.

The global Conformal Coating AOI System market size was estimated at USD 384.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 9.50% during the forecast period.
