Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Coniferous Pulp competitive dynamics, regional economic interdependencies, and supply chain reconfigurations.Pulp is mainly divided into wood pulp, waste pulp and non-wood pulp according to its raw material source. There are two major categories of wood pulp, namely coniferous pulp and broadleaf pulp. Generally, coniferous pulp has stronger toughness and stretchability than broadleaf pulp, so a certain proportion of coniferous pulp is usually incorporated in the use of wood pulp to enhance paper toughness.
