Report Overview:

Connected home security system is a set of integrated systems connects to your home Wi-Fi network so you can monitor and control your security devices using your smartphone and an app. Entry-level systems typically include a couple of door and window sensors, a motion detector, and a hub that communicates with these devices using one or more wireless protocols such as Wi-Fi, Z-Wave, ZigBee, or a proprietary mesh network. You can add extra door, motion, and window sensors to provide coverage for your entire house and build a comprehensive system that includes door locks, garage door openers, indoor and outdoor surveillance cameras, lights, sirens, smoke/CO detectors, water sensors, and more. The key part of connected home security system is smart Hub or smart control panel. The hub connects to your router via a wired ethernet connection and infiltrates your airwaves with a signal that the smart home devices respond to. Therefore, our data covers the entire system. Our data does not cover separate components.

In the market, Samsung, Panasonic and other companies can provide a separate device or the entire system equipment. However, some companies only provide the home security system service. These companies do not directly produce home security devices. At present, these companies include Armorax, Moni and Frontpoint, Comcast, Securitas and so on. ADT Security and Vivint can produce connected home security system for their own service platform. Our data covers equipment manufacturers. At the same time, we also list the major service providers in Europe and the United States. Connected home security system is part of a smart home. Therefore, our data does not cover general home monitoring or fire control system.

Home security system service industry has a long history. However, the home security system service platform is a large connection platform. This also brings a lot of problems. Connected home security system is a small system. This system can make up for the deficiencies of large systems. Since 2013, connected home security system has grown rapidly.

The Global Connected Home Security Device Market Size was estimated at USD 187.46 million in 2023 and is projected to reach USD 321.37 million by 2029, exhibiting a CAGR of 9.40% during the forecast period.
