Consolidated Freight Shipping, also known as Freight Consolidation or Less-Than-Truckload (LTL) Consolidation, is a logistics strategy where multiple shipments from different shippers are combined into a single, full truckload for a portion of their journey. Think of it as a carpool service for freight. Instead of each shipper paying for a partially empty truck, they share the space and the cost, making the entire process more efficient and economical. Consolidated Freight Shipping Solutions are a smart, strategic approach to logistics that turns the challenge of shipping small loads into an opportunity for efficiency and savings. By pooling resources, businesses can lower their costs, reduce their environmental impact, and create a more resilient and scalable supply chain. It's a fundamental service offered by most modern 3PLs and is a critical component of today's complex global trade ecosystem.

The global Consolidated Freight Shipping Solutions market size was estimated at USD 2557451.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.30% during the forecast period.
