Abstracts

Construction insurance refers to a specialized category of insurance products designed to protect parties involved in construction projects?including owners, contractors, subcontractors, architects, and engineers?from financial losses due to risks such as property damage, bodily injury, design errors, contractual disputes, delays, equipment failure, and natural disasters. Key policy types include builders risk insurance, which covers physical damage to structures under construction; general liability insurance, addressing third-party injury or property damage claims; professional liability (errors and omissions) insurance for design professionals; and surety bonds, which guarantee project completion or payment to subcontractors and suppliers. These policies are often tailored to project size, complexity, location, and regulatory requirements, with coverage terms negotiated to address specific exposures like materials, labor, equipment, and potential legal liabilities.

The global Construction Insurance market size was estimated at USD 14800.0 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.50% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Construction Insurance market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current
