Report Overview

An Unmanned Aerial Vehicle (UAV), commonly known as a drone, is an aircraft without a human pilot aboard. Consumer drones are enjoyable to fly by yourself or with friends, and within reasonable payload limits, they can also carry cameras, which then would be able to capture beautiful scenery that normally only airplanes or helicopter views can reach.

UAVs are a component of an unmanned aircraft system (UAS); which include a UAV, a ground-based controller, and a system of communications between the two. The flight of UAVs may operate with various degrees of autonomy: either under remote control by a human operator or autonomously by onboard computers.
