Abstracts

Container short - term leasing refers to an arrangement where a lessee rents shipping containers from a lessor for a relatively brief period, typically ranging from a few days to up to three years. This type of leasing is designed to meet the temporary needs of businesses or individuals for container usage, such as handling sudden surges in cargo volume, fulfilling short - term project requirements, or dealing with seasonal fluctuations in shipping demand. It offers lessees the flexibility to access container resources without the long - term commitment and high costs associated with purchasing containers. During the lease term, the lessee is responsible for the proper use and return of the container in a specified condition, while the lessor retains ownership and may be responsible for certain maintenance and management tasks depending on the lease agreement.
