## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Continuous Optical Parametric Oscillator (OPO) competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global continuous optical parametric oscillator(OPO) production reached 4,660 units, with an average global market price of US\$71,200 per unit. A continuous wave optical parametric oscillator (CWO) is a device that achieves wavelength-tunable laser output through nonlinear optical effects. Using nonlinear crystals (such as BBO, LBO, KTP, PPKTP, and PPLN) under CWO laser pumping, the device splits the high-frequency pump photon into two low-frequency photons (signal light and idler light) through a parametric down-conversion process. This generates a tunable, narrow-linewidth, and highly coherent CWO laser source. This device boasts wide wavelength tunability, high resolution, and excellent coherence. It is widely used in high-resolution spectroscopy, molecular detection and environmental monitoring, infrared medical diagnostics, nonlinear optical research, military and security fields (infrared countermeasures and target recognition), and quantum optical experiments. The upstream suppliers include high-purity nonlinear crystal suppliers (such as BBO, LBO, and PPLN) and high-power pump laser manufacturers. The midstream suppliers include CWO OPO manufacturers, whose core technologies lie in nonlinear frequency conversion efficiency, thermal stability, and resonant cavity optimization. The downstream suppliers primarily include research institutions, defense laboratories, medical device manufacturers, environmental monitoring companies, and industrial spectroscopy equipment suppliers.

The global Continuous Optical Parametric Oscillator (OPO) market size was estimated

at USD 332.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.10% during the forecast period.
