Report Overview

While weighted blankets are known for having tons of benefits (think: stress relief, improved sleep, and an overall calming effect on your body), sleeping with an extra 15 or 20 pounds isn't always easy when a customer is a hot sleeper. The good news is that there are actually Cooling Weighted Blanket (Tree Napper) s out there to address this problem—they're designed to feel like the cool side of the pillow, so we can enjoy the calming effects of a weighted blanket without the added heat. Usually made of breathable materials like organic cotton or bamboo, these cooling versions have moisture-wicking capabilities that help us feel sweat-free and comfortable. While the fabric often feels cool to the touch, it's important to note that most rely on temperature-regulating technology to prevent us from overheating—so we'll still need a window air conditioner or reliable tower fan in the bedroom during the summer.
