## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Core Scanner competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Core Scanner is a specialized analytical instrument used in geology, mining, and environmental sciences to examine and analyze core samples obtained from drilling. These scanners employ various imaging and spectroscopic techniques, such as X-ray fluorescence (XRF), Laser-Induced breakdown spectroscopy (LIBS), hyperspectral imaging, and computed tomography (CT), to capture high-resolution structural, mineralogical, and geochemical data. By providing rapid, non-destructive analysis, core scanners enable researchers and industry professionals to assess lithological compositions, identify valuable minerals, and gain insights into subsurface conditions. Their application enhances exploration efficiency, reduces reliance on traditional lab-based testing, and supports data-driven decision-making in resource evaluation and geotechnical investigations. The core scanner market is experiencing steady growth driven by increasing demand for high-resolution, automated geological and material analysis in industries such as mining, oil and gas, and environmental research. Technological advancements in imaging, spectroscopy, and automation have significantly enhanced the capabilities of core scanners, making them indispensable tools for efficient and accurate core sample evaluation. The market is also benefiting from a growing emphasis on digital transformation and data-driven decision-making across resource exploration sectors. However, challenges such as high equipment costs and the need for skilled operators remain potential barriers to wider adoption. Overall, the market presents strong opportunities for innovation and expansion, especially as sustainability and resource optimization become central themes in exploration and analysis.

The global Core Scanner market size was estimated at USD 113.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.80% during the forecast period.
