Abstracts

A coronary scored balloon dilation catheter, also known as a scored balloon dilatation catheter or a cutting balloon catheter, is a special medical device. It is mainly used during coronary interventional surgery to deliver a balloon into the coronary artery through a catheter, and then use the expansion of the balloon and the cutting effect of the scored blade to expand the narrowed or blocked coronary artery and remove the plaque on the blood vessel wall. Plaque or calcified material. The catheter combines balloon dilation and cutting capabilities to provide more precise and safer treatment during surgery, thereby improving blood supply to the heart. In addition, this kind of catheter usually consists of a catheter body, a balloon, a radiopaque marker, a connector and other structures. The outer surface of the balloon has a knife-like structure to make the surgical process more precise and safe. With the aging of the population and the rising incidence of cardiovascular disease, the market demand for coronary scored balloon dilatation catheters is increasing. More and more patients are choosing interventional surgery to treat cardiovascular diseases, which has led to rapid development of this market. In addition, the continuous advancement and innovation of medical technology provide important support for the development of the coronary artery scored balloon dilatation catheter market. The design and manufacturing technology of new catheters are constantly improving, making the catheters more superior in terms of expansion effect and cutting accuracy, while also reducing surgical risks and complication rates. These technological innovations have driven the rapid development of the market. In short, the coronary artery scored balloon dilatation catheter market has broad development prospects and potential.

The global Coronary Scored Balloon Dilatation Catheter market size was estimated at USD 707.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.30% during the forecast period.
