Corrosive Location Lighting refers to a special lighting system designed to meet the needs of safe production, equipment maintenance and personnel operation in harsh environmental conditions such as corrosive gases, liquids, dust or high humidity. The system uses corrosion-resistant materials (such as stainless steel, anti-corrosion coatings), sealed structures, explosion-proof designs and high protection levels (IP65 and above) to ensure long-term stable operation of lamps in strong acid, strong alkali, salt spray or chemical vapor environments, while providing sufficient illumination and uniform light distribution to avoid the risk of leakage, short circuit or lighting failure caused by corrosion, and ensure personnel safety and production continuity.

The global Corrosive Location Lighting market size was estimated at USD 645.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.80% during the forecast period.
