Abstracts

A corrugated bolted steel tank is a type of storage tank made from corrugated steel panels, which are bolted together to form a strong and durable structure. These tanks are typically used for the storage of liquids, such as water, chemicals, and other industrial fluids. The corrugated design of the steel panels provides additional strength and stability while minimizing the amount of steel required. The bolted assembly method allows for easier transportation and assembly, making these tanks a flexible and cost-effective solution for a wide range of applications. They are commonly used in both above-ground and underground installations, offering scalability, ease of maintenance, and the ability to expand or modify the tank's size if necessary.

The global Corrugated Bolted Steel Tank market size was estimated at USD 462.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.10% during the forecast period.
