## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Corrugated Steel Storage Silos competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Corrugated Steel Storage Silos production reached approximately 21814 units, with an average global market price of around US\$ 23746 per unit. Corrugated Steel Storage Silos are robust, cylindrical or rectangular structures constructed from corrugated steel sheets?thin, high-grade steel panels with a wavy (corrugated) pattern designed to enhance structural strength and rigidity. These silos are specifically engineered for bulk storage of granular materials, including grains (wheat, corn, rice), seeds, animal feed, and sometimes industrial commodities like coal or cement. The corrugated design is a defining feature: the alternating ridges and grooves distribute weight evenly, allowing the silos to withstand heavy vertical loads (from stored materials) and external forces such as wind, rain, or seismic activity, while minimizing material thickness and overall weight.

The global Corrugated Steel Storage Silos market size was estimated at USD 518.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.10% during the forecast period.
