Derived from the endosperm of guar beans, cosmetic grade guar gum is a natural, water-soluble polysaccharide used primarily as a thickener, stabilizer, and conditioning agent in personal care and cosmetic formulations; its high molecular weight and hydrocolloid properties make it effective for enhancing viscosity, improving texture, and providing film-forming capabilities in products such as shampoos, lotions, creams, and gels, where it also contributes to emulsion stability, moisture retention, and a smooth application feel without altering color or odor.
